

Plot 1322
Shehu Yaradua Blvd.
Mabushi District, Abuja

The background features three large, stylized blue swirls. One is in the top center, one is in the bottom right, and one is in the bottom left. They are rendered in a gradient from light blue to dark blue.

BEAUTY LOUNGE
— BluCabana —

At **BEAUTY LOUNGE**, we believe that taking care and pampering yourself should not be a special luxury. We feel it is a necessity. Our expert services and professional treatments will help you remove the common tensions and relax.

BEAUTY LOUNGE offers you a spectrum of unique treatments:

- Nail Care and Waxing
- Make Up and Tattoo Artistry
- Laser Hair Removal
- Cellulite Treatment and Body Contouring
- Mesotherapy
- Dermabrasion

LASER PERMANENT HAIR REDUCTION

 **BEAUTY LOUNGE** approach to laser hair removal provides the perfect solution to your needs with guaranteed results.

We use the latest and fastest most powerful lasers available fully FDA approved. No redness, no burning and excellent results on all skin types. We are capable of treating all skin and hair types with darker skin tones or lighter hair color.

DIODE LASER is the GOLD STANDARD for light brown (type III) to fair (type II) skin tone. What was once thought as impossible, virtually painless diode laser hair removal is now available.

To avoid the pain associated with conventional lasers, the breakthrough technology called Super Hair Removal (SHR) uses low energy and rapid pulsing diode laser.

Since hair grows in different phases over time, Diode Laser requires multiple treatments for desired results. The average number of visits necessary to see permanent hair reduction is 4 to 6.

NDYAG LASER hair removal is recommended for tanned or darkest skin. One of the main advantages of this laser is that its melanin absorption is very low. Melanin is what gives your skin its colour. The more melanin you have, the darker your skin and vice versa. Because of its low absorption of it, there is very little risk of your skin to get damaged by hyper/hypo pigmentation.

Single pulsed lasers use high energy to be effective, and would require the use of numbing creams to ease the pain. To achieve permanent hair reduction, several sessions are needed. The number of sessions depends on the area of the body being treated.

BEFORE YOUR LASER HAIR REMOVAL

- Do not shave area to be treated before your appointment.
- Avoid any unnecessary UV exposure to the areas to be treated for 4 weeks prior to treatment.
- Do not pluck, wax, or use a depilatory in the areas you wish to treat for 4 weeks prior to your treatment.
- Avoid self-tanning products for 4 weeks prior to treatment.
- Stop application of NanoWhite Intensive Underarm Cream with Retinol one week before and one week after your Underarm

AFTER YOUR LASER HAIR REMOVAL

- Some redness in the treated area may occur after your treatment. Apply cold soothing gel or inflamers. The redness will subside in a few hours.
- Avoid applying exfoliants (glycolics, retinoids, etc.) to the treated area for 7 days.
- Apply sunscreen of SPF 30 or higher to exposed treated area for at least 6 weeks.
- Keep area clean and wash gently. Do not use very hot water. Do not use sauna.
- Do not use deodorant or antiperspirant for 12 hours after underarm hair removal

LASER HAIR REMOVAL CONTRA-INDICATIONS

You should not receive this service if:

- You are pregnant or breastfeeding.
- You have a history of herpes simplex virus in the area to be treated.
- You have tattoos in the area to be treated.
- You have taken Accutane in the last 6 months. This medication can make your skin sensitive.

TREATMENT INTERVALS

- Timing between laser hair removal treatments is very important for best results.
- Different areas of the body have different hair growth cycles.
- In order to catch the most hair in the active cycle, treatments should be scheduled according to the hair growth cycles.
- Face and neck treatments should be scheduled every 4-6 weeks, trunk areas including bikini, chest, back, underarms, stomach etc. should be scheduled ever 6-9 weeks, and legs 7-10 weeks apart.
- Typically 6 to 8 sessions are required to catch each cycle of hair growth, although some people may be satisfied with their results sooner.
- Following these guidelines should result in the greatest reduction of hair.

CELLULITE TREATMENT & BODY CONTOURING

BEAUTY LOUNGE uses safe, non-invasive and effective method to treat cellulite and tighten skin for ageing.

If you're looking for a longer-lasting solution, endermologie involves kneading the skin with a rolling suction device to boost circulation and stimulate collagen production.

- Visible results after the first treatment
- 15-25 minutes per treatment
- Shortest treatment course 6-8 treatments!

Reaction Radio frequency Reaction™ offers multiple treatment applications for the industry's most-wanted aesthetic treatments:

- Cellulite treatment
- Circumferential reduction
- Skin tightening for aging & lax skin on the face and body
- Skin tightening retreatment for appearance of stretch mark

Reaction™ combines the mechanism of advanced RF energy and vacuum therapy that work with the body's natural regeneration process to deliver safe and efficient treatments for cellulite, body contouring and tightening of the skin.

Cellulite machine treatment provides the ability to deliver safe and effective treatments with superior treatment control, precision targeting and broader dermal penetration for maximum results in minimal time.

Simultaneously, the unique vacuum therapy maximizes the penetration of RF energy in the treatment area and also increases local blood circulation, stimulates lymphatic drainage and assists in the shrinkage of fat cell volume.

COSMETICS TREATMENT

MESOTHERAPY

You've looked in the mirror and you've seen them. Creeping ever so menacingly around your face. Those pesky detestable wrinkles. The telltale signs of aging.

You've heard of Botox but you're reluctant to do it. Plus there's the cost to consider. What if we told you there was a needle free alternative? Needle-free Mesotherapy Infusion. It may seem like a mouthful to pronounce but the method really works well on your skin!

Unlike a serum that nourishes the outer layers of your skin; the mesotherapy infusion goes deeper and nourishes your skin not only from the outside but also from the inside by opening up a microscopic channel in your skin to achieve the penetration needed to get beneath the outer layers. The natural solutions contain vitamins, minerals, amino acids and antioxidants that rejuvenate, promote collagen and elastin production, improve hydration and increase skin metabolism.

EXCELLENT FOR:

- Anti-ageing
- Collagen regeneration
- Skin hydration
- Skin firming and toning
- Body sculpting and cellulite reduction
- Stretch mark reduction

WILL IT HURT?

We're telling it like it is: this is a pain-free safe alternative. No downtime. You can get the treatment done during your lunch hour and then head back to work. Your skin will be rejuvenated as the solutions contain vitamins, minerals, amino acids and anti-oxidants that will promote the production of collagen and elastin. Be prepared to receive flattering compliments on your skin's youthful glowing appearance upon your return to work. You may feel a prickly sensation during the treatment which will actually feel like your skin is being massaged.

HOW OFTEN SHOULD I HAVE THE TREATMENT?

Although you will definitely see visible results after your first treatment, the effects of mesotherapy infusion are cumulative and a series of 4-6 treatments spaced two weeks apart is recommended to start with maintenance treatments every 6-8 weeks.

DERMABRASION

A complete medical aesthetic solution, Pristine treats a range of common skin conditions – including aging, sun exposure, acne, scars tissue and stretch marks – to improve the overall quality and appearance of patient's skin.

The Pristine microdermabrasion system is based on two sole functions: **exfoliation and vacuum**. Incorporating genuine, laser-cut diamonds into its treatment heads, Pristine is powered by the most reliable motor on the market to create the optimal microdermabrasion treatment. Industry-leading experience and expertise are applied in the production of quality diamond tips which gently exfoliate the skin without cutting or scratching. The use of genuine diamond tips ensures 100% treatment accuracy time and again.

The Pristine system exfoliates dead cells from the skin surface, cleaning the pores from the inside out and stimulating local blood flow and collagen production. The Pristine treatment is free of abrasion, irritations and any discomfort, allowing patients to benefit from a fully customizable, clean aesthetic procedure that is both relaxing and enjoyable and, most importantly, delivers results from the first treatment.

MAJOR ADVANTAGES:

- Safe treatments
- Hygienic and sanitary
- No clogging
- Vast treatment options
- Minimum consumables
- No risk of damaging sensitive areas
